

A high-angle photograph of a middle-aged couple smiling and looking down at a wooden staircase. The man, with grey hair and a beard, wears a light blue and white striped button-down shirt. The woman, with dark curly hair, wears a light-colored blouse. They are standing on a wide wooden staircase with a dark wood handrail. To the left, a large green indoor plant with broad leaves sits on the floor. The background shows a stone wall and a window. The overall atmosphere is warm and inviting.

Stairs and Walls

A beautifully designed floor can only reach its full potential if it's installed by highly skilled craftsmen.

All of our installers are hand selected for their craftsmanship, family values, and passion for creating amazing flooring centrepieces.

Our Technology

With Lifewood patented “Stabilised Solid” technology we can guarantee your floor will last a lifetime.

- ① *No cheap substitutes*
Each layer uses the same hardwood, creating superior stability and a higher resistance to termites.
- ② *Hand selected boards*
Only the highest grade boards are selected for the top layer, creating colour consistency and a beautiful looking floor.
- ③ *Patented hardwood core*
Our unique engineering method helps stabilise the board and prevents the natural movement of wood, which can result in cupping and shrinking.
- ④ *100% sustainable*
No part of the tree is wasted. No other timber is required to construct our floorboards.
- ⑤ *Hard wearing coatings*
Our custom formulated coatings bring our floors to life, highlighting their natural beauty and protecting them from damage.
- ⑥ *Resandable*
Our boards have a thick surface layer which can be sanded multiple times. Lifewood floors are designed to last a lifetime.
- ⑦ *Low emissions*
We use very low emission glue that is safe in your home and guarantees the boards do not delaminate.
- ⑧ *Moisture resistant*
Our patented core design prevents moisture getting into the board. We then coat the entire board in a moisture barrier for added protection.
