

A high-angle photograph of a middle-aged couple descending a wooden staircase. The man, with grey hair and a beard, wears a light blue and white striped button-down shirt and dark trousers. The woman, with dark curly hair, wears a light-colored button-down shirt. They are both smiling and looking towards the camera. The staircase has a wooden railing and a white balustrade. A large green indoor plant is on the left, and a small blue and white striped pot is visible. The floor is made of wide wooden planks. A semi-transparent white box with a geometric pattern is centered over the image, containing the text 'LIFEWOOD' and '2019 RETAIL PRICE GUIDE'.

LIFEWOOD

Stairs and Walls

A beautifully designed floor can only reach its full potential if it's installed by highly skilled craftsmen.

All of our installers are hand selected for their craftsmanship, family values, and passion for creating amazing flooring centrepieces.

LIFEWOOD

Our Technology

With Lifewood patented “Stabilised Solid” technology we can guarantee your floor will last a lifetime.

- 1** *No cheap substitutes*

Each layer uses the same hardwood, creating superior stability and a higher resistance to termites.
- 2** *Hand selected boards*

Only the highest grade boards are selected for the top layer, creating colour consistency and a beautiful looking floor.
- 3** *Patented hardwood core*

Our unique engineering method helps stabilise the board and prevents the natural movement of wood, which can result in cupping and shrinking.
- 4** *100% sustainable*

No part of the tree is wasted. No other timber is required to construct our floorboards.
- 5** *Hard wearing coatings*

Our custom formulated coatings bring our floors to life, highlighting their natural beauty and protecting them from damage.
- 6** *Resandable*

Our boards have a thick surface layer which can be sanded multiple times. Lifewood floors are designed to last a lifetime.
- 7** *Low emissions*

We use very low emission glue that is safe in your home and guarantees the boards do not delaminate.
- 8** *Moisture resistant*

Our patented core design prevents moisture getting into the board. We then coat the entire board in a moisture barrier for added protection.
