

2025 TRADE PRICE GUIDE

Learn about our patented timber flooring design and discover the price of your floor, fully installed.

LIFEWOOD

About Us

Fueled by innovation and a desire to create an outstanding product, we began our journey in 2002 by pioneering bamboo flooring in the Australian market. The inherited difficulty in preventing bamboo from expanding is what led Lifewood founder, Mark Hutchison, to develop our patented design. This unique design enables us to guarantee your floor will look amazing and last a lifetime.

We pride ourselves in producing not only the world's most beautiful floorboard, but also the most sustainable manufacturing process which reduces waste and supports local Australian farmers. All our timbers are hand selected for their beauty and designed to enrich the lives of each customer by bringing the natural essence of real timber into their home.

Why Lifewood Supports Trillion Trees

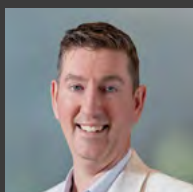

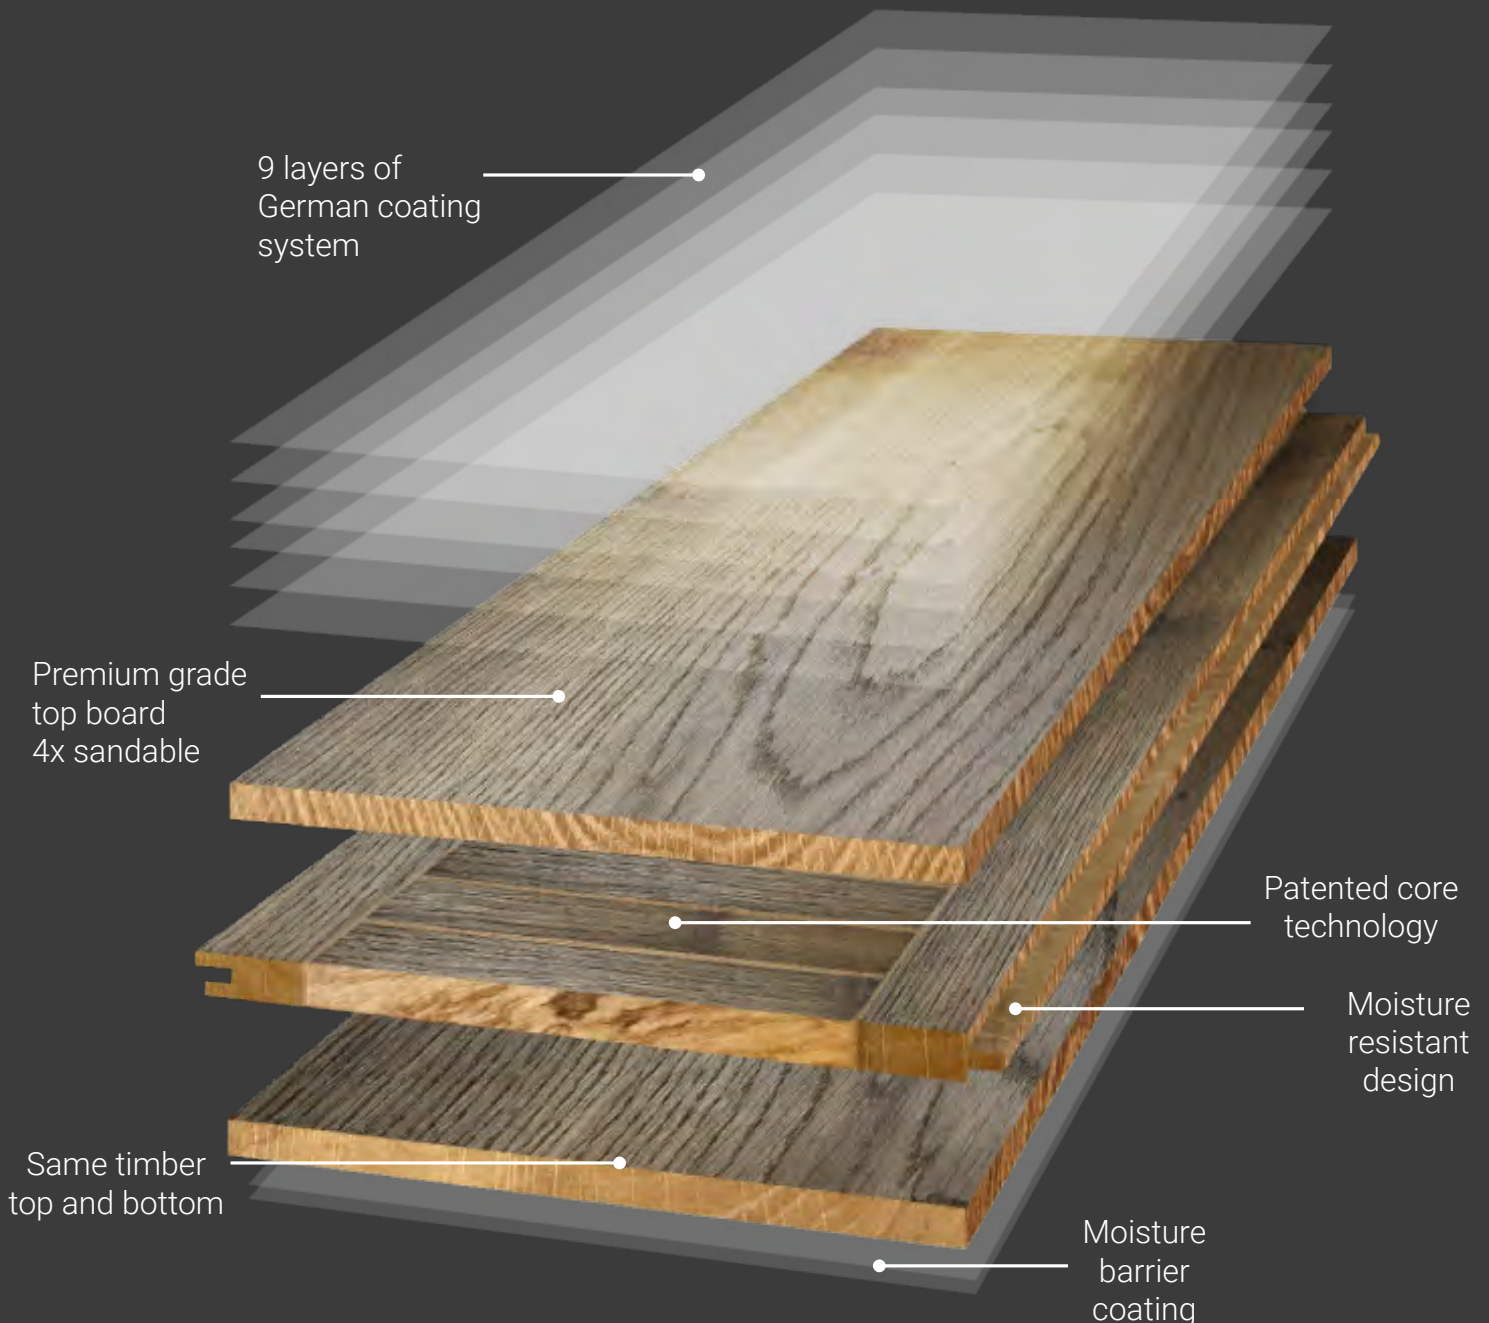

Lifewood's journey began 20 years ago, as Bamboozle, creating beautiful Bamboo flooring for Perth homes. Over the last 20 years, Lifewood has evolved to become a company with a keen interest in ethically sourced timber, sustainability in the production line (our patented design uses all of the tree, with no waste), and a commitment to the environment and humanitarian causes. Trillion Trees have been a beacon of light, enabling Lifewood to meet our promise to replace trees for every floor laid. Lifewood is proud to support Trillion Trees.

Stabilised Solid[®] Technology

Designed here in Perth, our **Stabilised Solid[®]** flooring structure combines the beauty of solid timber with the strength and durability of engineered flooring.

The cross-engineered core layer allows us to make wider, bolder flooring designs to showcase the true beauty of natural timbers throughout your home.

“My passion for timber floor craft led me to invent the world’s best floorboard.”

Mark Hutchison, Lifewood Founder & Managing Director

What sets Stabilised Solid[®] apart from other floorboards?

① *No cheap substitutes*

Each layer uses the same hardwood, creating superior stability and a higher resistance to termites.

② *Hand selected boards*

Only the highest grade boards are selected for the top layer, creating colour consistency and a beautiful looking floor.

③ *Patented hardwood core*

Our unique engineering method helps stabilise the board and prevents the natural movement of wood, which can result in cupping and shrinking.

④ *100% sustainable*

No part of the tree is wasted. No other timber is required to construct our floorboards.

⑤ *Hard wearing coatings*

Our custom formulated coatings bring our floors to life, highlighting their natural beauty and protecting them from damage.

⑥ *Resandable*

Our boards have a thick surface layer which can be sanded multiple times. Lifewood floors are designed to last a lifetime.

⑦ *Low emissions*

We use very low emission glue that is safe in your home and guarantees the boards do not delaminate.

⑧ *Moisture resistant*

Our patented core design prevents moisture getting into the board. We then coat the entire board in a moisture barrier for added protection.

Natures

S T E E L

Crafted and designed to elevate flooring, **Natures Steel**® Bamboo Core Flooring Technology is the ultimate choice for a durable, cost-effective timber flooring solution in Perth. Each board is engineered with Lifewood's patented cross-engineered core layer, featuring a bamboo core.

What sets Natures Steel[®] apart from other floorboards?

- 1 Solid multi-layered flooring**
We use only premium grade timber and bamboo core layer. This design allows us to always select the most attractive looking wood for the top layer.
- 2 Cross-layered technology**
Our patented cross-layered technology guarantees your floorboards will have maximum stability against cupping or warping
- 3 Cost effective solution**
The bamboo core of our design offers a stronger and durable flooring solution.
- 4 Designed for the climate**
We take great care to acclimatise your flooring before we install it. This means you can floor is ready to walk on and furniture moved back in almost instantly.
- 5 Responsible & Sustainable**
Our unique design means no part of the tree's timber is wasted during the manufacturing process. We are able to operate in a sustainable way without compromising on quality.
- 6 Natural Look & Feel**
Our patented flooring technology brings a a whole new kind of warm, natural feel that is very difficult to achieve in carpet or tiles.
- 7 Prefinished flooring**
Your floor is ready to walk on within hours of being installed. No need to move out or find short-term accommodation as is the case with the sand and polish method.
- 8 Quick Installation**
Our prefinished floors are wiped clean in minutes. Also, your floor is ready to walk on within hours of being installed.

Natures®

S T E E L

We've made hardwood floors even harder with our Nature's Steel collection, unique to Lifewood. This collection features a cross-engineered bamboo core and comes with a 25-year warranty.
